

Dripping Springs Water Supply Corporation Scholarship Policy

The Dripping Springs Water Supply Corporation recognizes the importance of developing and supporting future leaders from our community. To help support this important and worthwhile goal we have established a fund to distribute financial scholarships to high school seniors graduating from Dripping Springs High School, private schools inside the Dripping Spring Water Supply Corporations' service area and home-schooled students whose parents/guardians are members of the Water Supply Corporation.

These scholarships will help qualified applicants offset the costs associated with continuing their education in a college, trade or technical school and/or to offset the cost associated with enlistment in the United States military (e.g., storage of a motor vehicle).

Students may apply for these scholarships by completing an application and submitting it to the Dripping Springs Water Supply Corporation. In order to be considered, completed applications must be received no later than April 30, 2019. A letter of recommendation may be included with the application but is not required.

Members of the Dripping Springs Water Supply Corporation may also submit/nominate names of individuals who should be considered for scholarship in an adult education program.

The applications will be reviewed by the Corporation's General Manager and Board of Directors for consideration and final determination. Once final determination has been made, each Board Member will sponsor one scholarship recipient in an award ceremony

NOTE: The scholarship will be paid directly to the learning institution or in the case of a military member directly to the entity providing the service.
